**A  
Mobile  
Restoration  
Company**

The goal of the project was to correct man-made impacts; 1,545 LF of incised and eroding stream were restored and new wetlands created to bring the area into compliance.

### Core Work Features

- Realigning existing stream and creating a new channel.
- Constructing high gradient step pools with step pool riffles.
- Constructing rock seep tie-ins.
- Constructing a cattle crossing stone ford with rock cascades.
- Creating a new wetland.
- Seeding with native and wetland mixes.
- Stabilizing buffer zone within bank full limits.
